It is a fair claim to
make that, in the
history of the slot car
racing hobby, there
has been nothing
previously published
that parallels this
text. When the author
set out on a journey to
build a slot car track
based on the

Scalextric product,
little did he appreciate
all the considerations
that this encompassed.

It was soon realised
that the building
process involved
considerably more
than mapping out a
design and assembling
track pieces, for this
alone did not assure a
good outcome. Many

choices needed to be made that together contributed to the outcome - a slot car track. Making a track was relatively easy.

Making it to be 'good' was a different matter altogether. But what is it that makes a good slot car track, and how should its construction be approached? What
